# EASYROOM™ SUNROOM KITS

Get the quality and craftsmanship of a Patio Enclosures® brand sunroom in a kit that you install yourself. Our EasyRoom™ DIY sunroom kits offer the strength and engineering of our custom-designed Patio Enclosures sunrooms. These rooms are permanent extensions of your home and are made with the highest quality materials to stand the test of time.

A Patio Enclosures sunroom with single-slope roof and white frame.

## Features

Our full 5-year warranty provides peace-of-mind protection for your investment and ensures your sunroom is free from defects in materials and factory workmanship.

All EasyRoom™ kits contain\*:

- | 3-inch-thick, powder-coated, extruded aluminum frame
- | single-pane glass or double-pane insulated glass with Low-E and argon gas
- | aluminum foam-core roof
- | glass or aluminum foam-core wings
- | center ridge beam (gable roof option)
- | full screens
- | door handle with security latch
- | weather stripping
- | fasteners for assembly
- | caulking
- | step-by-step instruction manual

\*Some components may require field modifications.  
Kits do not include foundation fasteners, gutters, downspouts, or site preparation materials.

Ideal for the experienced DIY-er.

## EasyRoom components

Extend the seasons,  
relax and enjoy the  
outdoors every day  
in the comfort of  
your home.

### Frame and doors

- | Three-inch-thick, powder-coated, extruded aluminum frame provides structural integrity to meet local and national building codes.\*
- | Two-lite sliding door panels included on each of three walls for a total of six sliding door panels and six stationary door panels.
- | Flexible door design allows the choice of door direction at the start of installation.
- | Ball-bearing wheels and nylon tires won't wear out the tracks of your sunroom providing easy operation of your doors.
- | Easy-to-use locks and anti-lift bar provide added security.
- | Low-profile wood handles provide an easy grip and allow all types of blinds and shades to open and close with ease.
- | Polypropylene weather stripping helps keep debris and bugs out.

Stainless steel, ball-bearing wheels surrounded by nylon tires will never wear out the tracks in your room.

\*Building codes vary by location. Please check with your state, city, municipality or county for permit requirements.

Made in the USA

## EasyRoom components

EasyRoom is simply the easiest way to add affordable living space and value to your home while bringing the natural beauty of the outdoors inside.

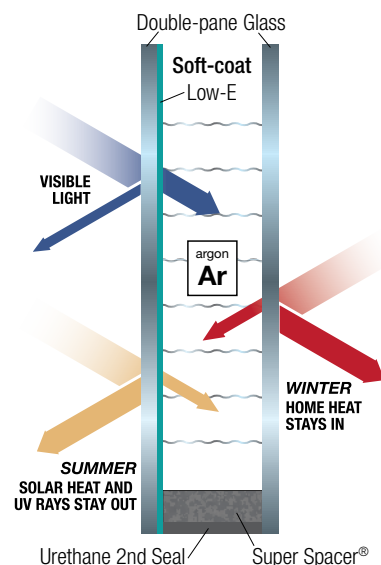

### Patio Enclosures exceptional glass

EasyRoom kits come with your choice of single-pane glass panels or dual-seal, double-pane insulated glass panels with low-E and argon gas to accommodate your budget and lifestyle. All of our glass features:

- | **Exclusive Edge-to-Edge Advantage®** — Up to 98 percent glass for more view per square foot than any other sunroom. Floor-to-ceiling, wall-to-wall glass optimizes your view and connects you to the outdoors.
- | **Safety tempered glass** — Tempered glass is designed to keep your family safe, which is why we temper our own glass and custom cut it for every sunroom we create.

Our double-pane, insulated glass offers the following additional features:

- | **IGCC/IGMA certified** — Our insulated glass passes the highest ASTM 2190 tests, including seal life and gas retention.
- | **Comfort-Gard® PLUS glass** — Reduces sun damage and fading from harmful UV radiation thanks to a soft-coat low-E coating.
- | **Warm edge Super Spacer® technology** — Between the two panes of insulated glass, non-conductive Super Spacer mylar reduces condensation, increases insulating performance and improves energy savings. Since the seal — not made of metal like most competitors' — flexes when the window is under pressure, the windows are more resilient and last longer.
- | **Argon-filled glass** — Colorless, odorless, non-flammable and non-toxic, Argon gas improves insulation and adds an extra layer of energy efficiency to your room.

# EASYROOM™ SUNROOM KITS

Patio Enclosures' EasyRoom sunroom kit with a gable room in sandstone color.

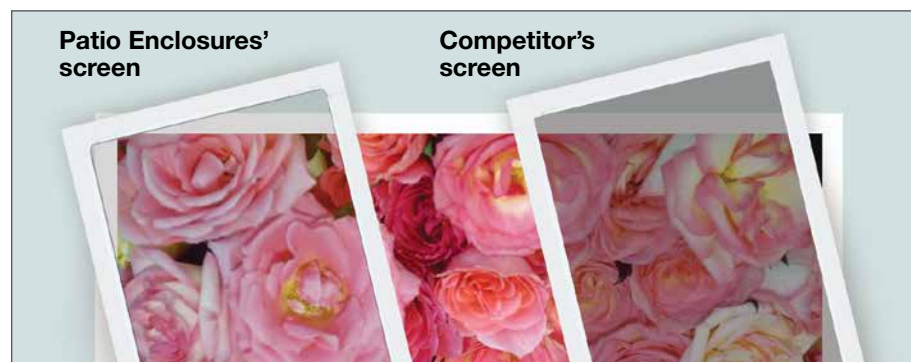

## EasyRoom components

Savor the sights and sounds  
of the outdoors with views  
from floor to ceiling,  
corner to corner.

### Super screens for a super view

Our super screen is a nearly-invisible black-painted aluminum screen cloth that is standard in all of our screen doors and windows. It outperforms less expensive fiberglass and eliminates the problems associated with other screens. It provides maximum visibility and strength, stays cleaner and resists sagging.

Our rolling screen panels are the finest in the industry. Made of high-quality, fully extruded materials, our unique design keeps our screen panels solidly in their tracks for dependable use.

Patio Enclosures' nearly-invisible black-painted aluminum screen mesh is standard in all our screen doors and windows. It provides maximum visibility and strength, stays cleaner and resists sagging.

# EASYROOM™ SUNROOM KITS

This is an actual un-retouched photo shot in our Macedonia, Ohio production facility. The only support system under our 3-inch roof panels with structural I-beams are the ones you see. There were no additional support systems underneath.

## EasyRoom components

We've spent years building  
the strongest roofs in the  
industry so you can be  
carefree in all kinds of  
weather.

### Would you park a two-and-one-half-ton Hummer H3 on your roof? We did!

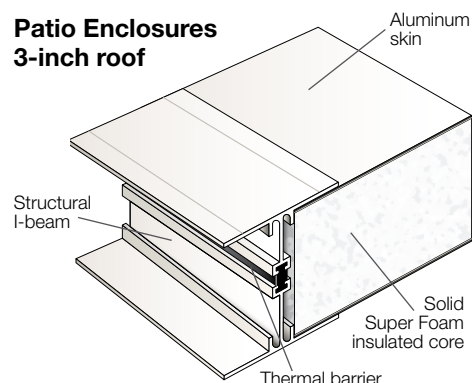

Because we're so confident of the engineered strength of our super-insulated roof system, we took this 5,100-pound Hummer for some real "off-road" activity. Our roof system passed this test with flying colors!

Aluminum foam-core roofs are environmentally safe, contain no chlorofluorocarbons (CFCs) and are highly resistant to mildew and moisture.

### As energy efficient as it is strong

- | **3-inch-thick panels** insulate from weather and sound and provide maximum structural integrity. Sunrooms are rated with a wind load of 80-100 mph and a roof snow load of 30 lbs. per square foot.
- | **Structural I-beams** provide strength to withstand maximum snow loads and contain a thermal barrier to reduce the transfer of heat or cold from the outside of the roof to the inside of the panel. This helps to keep your room more comfortable and minimizes the possibility of condensation.
- | Our panels are 3-feet wide unlike our competitor's 4-foot panels. A smaller width allows us to **use more structural I-beams**, providing you with a stronger roof. We go the extra mile to make sure your roof is structurally sound.
