EASYROOM®

Sunroom and Screen Room Kits

Get the quality and craftsmanship of a Patio Enclosures® brand sunroom or screen room in a kit that you install yourself. Our EasyRoom® DIY sunroom or screen room kits offer the strength and engineering of our custom-designed Patio Enclosures rooms. These rooms are permanent extensions of your home and are made with the highest quality materials to stand the test of time.

Your choice of kits

KIT OPTION 1 (AVI)

Three-season Sunroom with Double-pane Insulated Glass

Enjoy the outdoors from early spring until late fall, depending on your climate.

KIT OPTION 2 (AVR)

Three-season Sunroom with Single-pane Glass

Rain, wind and bugs won't keep you inside with our three-season glass sunroom.

KIT OPTION 3 (AVS)

Screen Room

Dine or relax morning, noon and night without the annoyance of bees, mosquitos and other flying insects.

Peace of mind warranty

All of our sunroom and screen room kits are backed by our full 5-year warranty to provide peace-of-mind protection for your investment. It ensures your room is free from defects in materials and factory workmanship.

*Relax and enjoy the outdoors every day
in the comfort of your home.*

EASYROOM® COMPONENTS: **FRAMES and DOORS**

FRAME

All Kits

Our 3½-inch-thick, extruded aluminum frame provides structural integrity for your room.

DOOR ROLLING SYSTEMS

All Screens

Triple track with nylon tires

Glass Sunrooms Only

Triple track with ball-bearing wheels in nylon tires

DOOR HANDLES AND LOCKING SYSTEMS

All Screens

Single-point locking system

Glass Sunrooms Only

Single-point locking system with anti-lift bar

Features of All EasyRoom® Kits

- 3½-inch-thick, powder-coated, extruded aluminum frame provides structural integrity to meet local and national building codes.*
- Flexible door design allows the choice of door direction at the start of installation.
- Polypropylene weather stripping helps keep debris and bugs out.

Rolling Doors

- **Screen Rooms** — Four sliding screens on each of three walls for a total of 12 movable screen panels.
- **Glass Sunrooms** — Two-lite sliding door panels included on each of three walls for a total of six sliding door panels and six stationary door panels.

Door Rolling System

- **All Screens** — Our screens feature nylon tires that glide easily and won't flatten under the weight of the frame.
- **Glass Sunrooms** — Ball-bearing wheels and nylon tires won't wear out the tracks of your sunroom providing easy operation of your doors.

Door Handles

- **All Screens** — Our screen handles are large, easy to grip and durable.
- **Glass Sunrooms** — Low-profile wood handles provide an easy grip and allow all types of blinds and shades to open and close with ease.

Locking System

- **All Screens** — Easy-to-use, single-point locking system.
- **Glass Sunrooms** — Easy-to-use single-point locks and anti-lift bar provide added security.

*Building codes vary by location. Please check with your state, city, municipality or county for permit requirements.

We've spent years building the strongest roofs in the industry so you can be carefree in all kinds of weather.

EASYROOM® COMPONENTS: **ROOFS**

3-INCH ROOF

NOTE:

3-inch-thick roofs come standard on most EasyRoom kits except 14'x16' kits with a single-slope roof.

Would you park a two-and-one-half-ton Hummer H3

on your roof? We did! Because we're so confident of the engineered strength of our super-insulated roof system, we took this 5,100-pound Hummer for some real "off-road" activity. Our roof system passed this test with flying colors!

Aluminum foam-core roofs are environmentally safe, contain no chlorofluorocarbons (CFCs) and are highly resistant to mildew and moisture.

As energy efficient as it is strong

- **3-inch-thick panels** insulate from weather and sound and provide maximum structural integrity. Sunrooms are rated with a wind load of 80-100 mph and a roof snow load of 30 lbs. per square foot.
- **Structural I-beams** provide strength to withstand maximum snow loads and contain a thermal barrier to reduce the transfer of heat or cold from the outside of the roof to the inside of the panel. This helps to keep your room more comfortable and minimizes the possibility of condensation.
- Our panels are 3-feet wide unlike our competitor's 4-foot panels. A smaller width allows us to **use more structural I-beams**, providing you with a stronger roof. We go the extra mile to make sure your roof is structurally sound.

This is an actual un-retouched photo shot in our Macedonia, Ohio production facility. The only support system under our 3-inch roof panels with structural I-beams are the ones you see. There were no additional support systems underneath.

Add affordable living space and value to your home while bringing the natural beauty of the outdoors inside.

EASYROOM® COMPONENTS: **PATIO ENCLOSURES® GLASS**

GLASS TYPES

Kit Option 1

Double-pane insulated glass

Kit Option 2

Single-pane glass

DOUBLE-PANE GLASS

Kit Option 1 only

Our double-pane glass features Super Spacer® technology and argon gas for increased energy efficiency.

Our exceptional glass

To accommodate your budget and lifestyle, EasyRoom sunroom kits come with your choice of double-pane insulated glass panels with low-E and argon gas or single-pane glass panels. All of our glass features:

- **Exclusive Edge-to-Edge Advantage®** — Up to 98 percent glass for more view per square foot than any other sunroom. Floor-to-ceiling, wall-to-wall glass optimizes your view and connects you to the outdoors.
- **Safety tempered glass** — Tempered glass is designed to keep your family safe, which is why we temper our own glass and custom cut it for every sunroom we create.

Our double-pane, insulated glass offers the following additional features:

- **IGCC/IGMA certified** — Our insulated glass passes the highest ASTM 2190 tests, including seal life and gas retention.
- **Comfort-Gard® PLUS glass** — Reduces sun damage and fading from harmful UV radiation thanks to a soft-coat low-E coating.
- **Warm edge Super Spacer® technology** — Between the two panes of insulated glass, non-conductive Super Spacer mylar reduces condensation, increases insulating performance and improves energy savings. Since the seal — not made of metal like most competitors' — flexes when the window is under pressure, the windows are more resilient and last longer.
- **Argon-filled glass** — Colorless, odorless, non-flammable and non-toxic, Argon gas improves insulation and adds an extra layer of energy efficiency to your room.

Savor the sights and sounds of the outdoors with views from floor to ceiling, corner to corner.

EASYROOM® COMPONENTS: **SCREENS**

SCREEN FRAMES

Screens on All Sunroom and Screen Room Kits

Durable, 7/8-inch-thick, butt-joined aluminum frames stay square to the frame, even with constant use.

Super screens for a super view

- Our super screen is a nearly-invisible black-painted aluminum screen cloth that is standard in all of our screen doors. It outperforms less expensive fiberglass and eliminates the problems associated with other screens.
- Our screens provide maximum visibility and strength, stay cleaner and resist sagging.
- Our rolling screen panels are the finest in the industry. Made of high-quality, fully extruded materials, our unique design keeps our screen panels solidly in their tracks for dependable use.
- Our screen frames are made using 7/8-inch-thick extruded aluminum that won't bend and can withstand constant use. The butt joint used in all four corners keeps the screen frame square so it rolls easily in its track.

Patio Enclosures' screen

Competitor's screen

Screens on All Sunroom and Screen Room Kits

Nearly invisible, black-painted aluminum screen mesh is standard in all our screen doors.

*Building codes vary by location. Please check with your state, city, municipality or county for permit requirements.
